

FIRST INTERNATIONAL CONFERENCE ON URBAN TRANSFORMATION

FOR CLIMATE CHANGE ADAPTATION
ICUT 2023

15th - 16th JUNE 2023

COEP Technological University, Pune, India

www.icut2023.com

OVERVIEW

Cities are the key contributor to climate change, as urban activities are major sources of greenhouse gas emissions. Choices made today about the types, features and location of long-lived infrastructure will determine the extent and impact of climate change. It is essential, therefore, to make cities an integral part of the solution in fighting climate change. **Urban transformation offers this opportunity for a city to regain its identity, improve living conditions, provide public and green areas (parks), and develop a modern urban infrastructure.** With the urban transformation, not only the physical characteristics of the space but also the social structure and economic dynamics change, and the economic value increases with these projects.

ABOUT

The Department of Planning (formerly known as the Town Planning Section) was founded in the year 1966. COEP has the distinction of being **first in the state to start a Post Graduate program in Town and Country Planning.** Since its inception, this program has grown into one of the widely respected post graduate Town and Country Planning program in the country. The undergraduate program in planning, the only one in Maharashtra state, was started in the year 2012. UG and PG courses conducted here, are committed to produce the best planners of the Nation to take up the challenges of physical and socio-environmental development of global standards. With an aim to be a Center of Excellence in Urban and Regional Planning and Sustainable Development, the department has achieved many milestones.

WHO CAN PARTICIPATE?

This conference aims to provide a common platform for relevant fields of Urban Planning, Architecture, Urban Design, Urban Management, Policy Planning, Data Analytics and Social studies to be a part of synthesizing knowledge that would lead to new insights on climate change adaptation for cities
