### **Vision of the Department:**

To be a leader amongst engineering institutions in India, offering value-based world class education and constantly pursuing excellence

### **Mission of the Department:**

**M1:** To offer state-of-the-art undergraduate, postgraduate, and doctoral programs.

**M2:** To develop employable and skilled undergraduates to accept the global and societal challenges, while imparting quality education at postgraduate and research level.

**M3:** To Foster the passion of life-long learning in all facets of employability.

### **Program Educational Objectives (PEOs)**

Cater to the needs of Indian as well as multinational industries. Be competent with a strong technological background to analyze data, formulate and undertake industrial problems and obtain viable solutions. Make successful career in industry / research / higher Studies. Be life-long learning and should be able to work on multi-disciplinary projects. Be Competent for effective communication, in management and in professional skills and ethics.

### **Program Outcomes**

Program Outcomes of Engineering program as per norms (common to all UG/ PG Programme)

**PO1. Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization for the solution of complex engineering problems.

**PO2. Problem analysis:** Identify, formulate, research literature, and analyses complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3. Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for public health and safety, and cultural, societal, and environmental considerations.

**PO4. Conduct investigations of complex problems:**

The problems:

- that cannot be solved by straightforward application of knowledge, theories and techniques applicable to the engineering discipline.

**COEP TECHNOLOGICAL UNIVERSITY, PUNE**  
A Unitary Public University of Government of Maharashtra  
(Formerly College of Engineering Pune)  
**School of Mechanical and Materials Engineering**  
Wellesley Road, Shivajinagar, Pune - 411005

- that may not have a unique solution. For example, a design problem can be solved in many ways and lead to multiple possible solutions.
- that require consideration of appropriate constraints/requirements not explicitly given in the problem statement. (like cost, power requirement, durability, product life, etc.).
- which needs to be defined (modeled) within appropriate mathematical framework.
- that often require use of modern computational concepts and tools.

**PO5. Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools, including prediction and modeling to complex engineering activities, with an understanding of the limitations.

**PO6. The engineer and society:** Apply reasoning informed by contextual knowledge to assess societal, health, safety, legal, and cultural issues and the consequent responsibilities relevant to professional engineering practice.

**PO7. Environment and sustainability:** Understand the impact of professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO8. Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of engineering practice.

**PO9. Individual and teamwork:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10. Communication:** Communicate effectively on complex engineering activities with the engineering community and with the society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO11. Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12. Life-long learning:** Recognize the need for and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

### **Program Specific Objectives (PSOs)**

**PSO1. Design and Development:** The ability to design and develop the products as per the need of the customers in the field of Mechanical and Allied Engineering Industries.

**COEP TECHNOLOGICAL UNIVERSITY, PUNE**  
 A Unitary Public University of Government of Maharashtra  
 (Formerly College of Engineering Pune)  
**School of Mechanical and Materials Engineering**  
 Wellesley Road, Shivajinagar, Pune - 411005

**PSO2. Engineering Analysis and optimization:** The ability to analyze and optimize the Mechanical systems/processes using various computational tools.

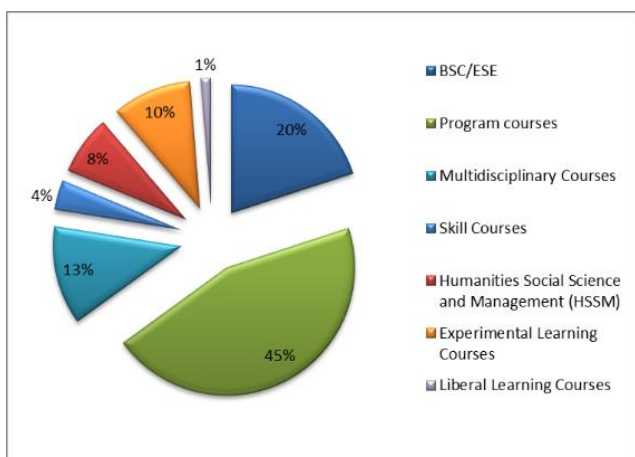

**PSO3. Society:** To strengthen Mechanical Engineering graduates who would value professional and ethical responsibilities while solving societal problems.

# Project based learning should be completed in VIII semester.

<b>*Program Elective Course V – Discipline-wise List</b>			
<b>Design Engineering</b>	<b>Thermal Engineering/Fluid Science</b>	<b>Manufacturing Science and Engineering</b>	<b>Other Disciplines</b>
Farm Machinery Design	Air Conditioning System Design	AI for Manufacturing	Dental Engineering
Design for Fatigue and Fracture	Power Plant Engineering	Enterprise Resource Planning (ERP)	Machine Learning for Mechanical Engineering
Mechatronics	Thermal Design and Management of Systems	Advanced Foundry and Forging technology	Sustainable and Green Energy

<b>**Program Elective Course VI – Discipline-wise List</b>			
<b>Design Engineering</b>	<b>Thermal Engineering/Fluid Science</b>	<b>Manufacturing Science and Engineering</b>	<b>Other Disciplines</b>
Fundamentals Of Food Process Design	Microfluidics And Nano-fluids	Advanced Framework Design	Sugar Technology
Automatic Control System	Fundamentals of Nuclear Power Generation	Product Lifecycle Management (PLM)	Robotics & AI
Material Handling System Design	Marine Engineering	Reliability Engineering	Dairy Plant Engineering

**Multidisciplinary Minors- Mechanical Engineering**

Experimental Stress Analysis	Internal Combustion Engines	Industrial Engineering & Operation Research
------------------------------	-----------------------------	---

<b>*Program Elective Course II – Discipline-wise List</b>		
<b>Design Engineering</b>	<b>Thermal Engineering/Fluid Science</b>	<b>Manufacturing Science and Engineering</b>
Advanced Finite Element Methods (FEM)	Principle Of Hydraulic Machines and System Design	Micro & Nano-Machining
Tribology	Computational Fluid Dynamics	Additive Manufacturing
Piping Design	Heat Exchangers: Fundamentals and Design Analysis	Tool and Die Design

<b>*Program Elective Course III – Discipline-wise List</b>			
<b>Design Engineering</b>	<b>Thermal Engineering/Fluid Science</b>	<b>Manufacturing Science and Engineering</b>	
CAD/CAM Customization	Advanced Computational Fluid Dynamics	Advanced Joining Techniques	
Mechanics of Composite Materials	Design of Thermal Systems	Reverse Engineering	
Steel Structure Design	Turbo machinery	Production and Operations Management	

<b>**Program Elective Course IV – Discipline-wise List</b>			
<b>Design Engineering</b>	<b>Thermal Engineering/Fluid Science</b>	<b>Manufacturing Science and Engineering</b>	
Design Optimization	Renewable Energy Resources	Metal forming Technology
